# AbscessCap™

## Abscess Irrigation Shield

ABSCCESSCAP

AbscessCap is a twist on abscess irrigation shield that allows a clinician to easily irrigate wounds below the surface of the skin.

### AbscessCap Features & Benefits

- Protruding Nozzle - allows penetration below the surface
  - one-handed probing
  - break up loculations
  - irrigate tunneling wounds
- Fits any standard saline bottle - delivers high volumes in a shorter amount of time
- Fits any standard syringe - versatility between preferred irrigation methods
- Built In Splash Shield - permits safe visualization of wound target while reducing splatter
- Large Nozzle Opening - creates a low pressure stream of fluid to safely flush the wound of pus and debris

### Advantages of irrigating deep wounds:

- Reduce Bioburden
- Exchange Saline for pus or debris
- Flush Out Deep Recesses
- Optimize Clearance
- Reduce Inflammation
